# Press Release

For Release November 1, 2010

## Mid South Fabrication & Coating named Code Stamp Certified Facility by ASME.

White Oak, TX, November 1, 2010: Mid South Fabrication & Coating is pleased to announce that on October 27, 2010 they were granted new issuance of American Society of Mechanical Engineers (ASME) Certificate of Authorization and Code Symbol Stamps of S, U, and the National Board (NB) R symbol stamp. These stamps indicate that Mid South's product and quality system conforms to the latest edition of the ASME Boiler & Pressure Vessel (BPV) Code which is considered the industry hallmark of acceptance and certification. It is recognized in more than 100 nations as a means of meeting government safety regulations, and complies with all safety laws and regulations in the United States and Canada.

ASME Code Symbol Stamps are used to indicate that the stamped item(s) conform to the latest edition of the ASME BPV Codes. Mid South will now be able to construct, repair, and inspect process piping and pressure vessels according to ASME standards. The company is currently producing structural fabricated products constructed to AWS specifications.

"Our Code Certification Team of Mark Svoboda, Josh Hamm, Mike Allen, and David Stine, PE, started working on this project in early 2010. They developed the plan, engaged professionals within the industry, and coordinated with the licensing agencies. I could not be prouder of the accomplishments of this team, it truly will take us to the next level in our overall quality program" according to Jerry Newman, Vice President of Operations. "This entire process went very smoothly due to the preparation and technical skills of this group."

Mid South Fabrication & Coating is a division of Mid South Engine & Machine, LLC. Founded in 1986, Mid South provides industrial engine sales, service, steel fabrication, parts manufacturing, and industrial coatings to the oil & gas, power generation, transportation, and construction industries. It operates offices in White Oak. For more information, visit [www.midsouthfab.com](http://www.midsouthfab.com).
